HISTORY

First glimpsed by Henry Hudson in 1609, in 1709 Queen Anne gave refuge to Palatine Germans fleeing the armies of Louis XIV on land that would become Newburgh. A royal grant in 1719 gave the settlers land from the Quassaick to a creek near the Balmville Tree. Finding the land ill-suited for farming, the settlers were soon replaced by those interested in river commerce; all roads led to Newburgh, which collected the bounty of the region to

be shipped on the Hudson River. The nation's first designated historic site is in Newburgh at the Revolutionary War Headquarters of Gen. George Washington. Incorporated as a Village in 1800, then a City in 1865, Newburgh's prosperity in shipping, then manufacturing and retail, led to a wealth of architecture.
