

# CRUDE OIL IN NEWBURGH: "VIRTUAL PIPELINE" ... *Real Risks*

**"Bomb trains" —that's the name given to mile-long trains filled with explosive crude oil traveling each day through our neighborhoods, past our waterfronts and beside irreplaceable drinking water resources. Along a U.S.-Canadian "virtual pipeline" of trains, barges and ships, repeated accidents have delivered overwhelming environmental damage, brutal economic losses—and tragically, the deaths of dozens of people.**

**JOIN YOUR NEIGHBORS AND GET THE FACTS**

**Monday, May 5 • 6–8 p.m.**

Newburgh Board of Education Auditorium  
Newburgh Free Library • 124 Grand Street • Newburgh, NY 12550

Riverkeeper and Scenic Hudson will present information about the rise in volatile crude oil transportation through the Hudson Valley and the specific risks facing Orange County as well as neighboring communities, including the proposed expansion of Global Partners' Hudson River oil terminal in New Windsor.

Visit [riverkeeper.org/crude](http://riverkeeper.org/crude) or [scenichudson.org](http://scenichudson.org) to learn more or for directions to the meeting.
